**Subject: Dover Street School, 619 East Dover Street, Milwaukee, WI 53207**

Dear Mr. Chojnacki:

On February 9, 1994, the Department of Natural Resources provided a notice to you that the degree and extent of petroleum contamination at the above-named site was required to be investigated and remediated. We have since been informed that the required investigation and remediation has been accomplished.

Based on the investigative and remedial documentation provided to the Department, it appears that the petroleum contamination at the above-named site has been remediated in compliance with the requirements of chs. NR 700 to 724, Wis. Adm. Code. Therefore, the Department considers the case "closed," having determined that no further action is necessary at the site at this time. However, the case may be reopened pursuant to s. NR 726.09, Wis. Adm. Code, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety or welfare or the environment. If you have any questions about this letter or the site in general, please contact me at the letterhead address or at (414) 229-0846.

Sincerely,

*James C. Delwiche*
